EMPOWERING HEALTHCARE, ENHANCING LIVES

Accufly Healthcare Private Limited

MYDR24
OPEN DOORS TO BETTER HEALTH

PROBLEMS IN HEALTHCARE DELIVERY

- Lack of Golden hour Healthcare facility in Emergency situation
- Overcrowded Government Hospitals
- High Costs of Private Healthcare
- Inadequate Infrastructure in Rural areas
- Lack of Nursing accountability
- Low Awareness & Digital Divide
- Mismanagement of Patient’s Health Record

SOLUTIONS

- Instant Services within Golden hours
- Rural & Urban Healthcare bridging
- Affordable Healthcare Access
- AI-Powered Diagnostics & Personalised Dash
- Emotional Connection in Healthcare
- Remotely patient Monitoring
- Stragetic Partnership

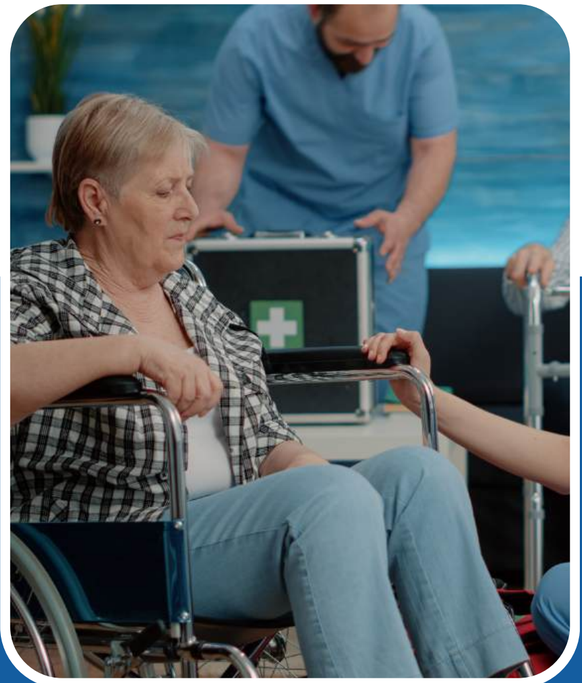
TARGET CUSTOMER SEGMENT

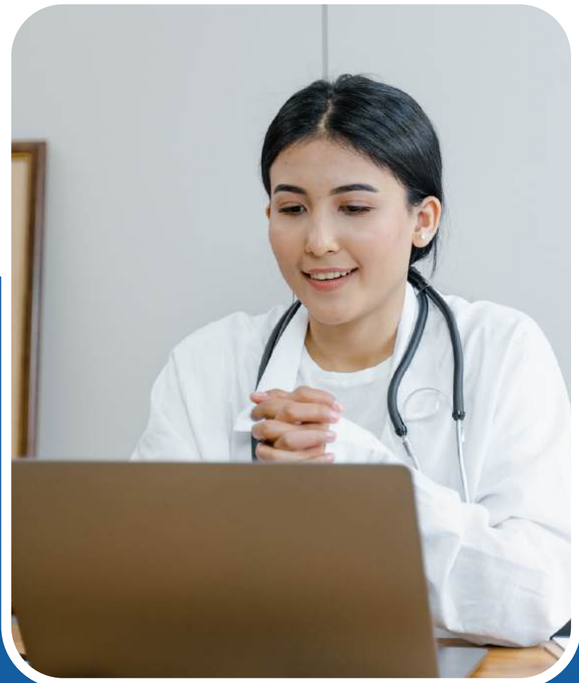
01 **Urban Underprivileged Populations**

02 **Rural & Remote Communities**

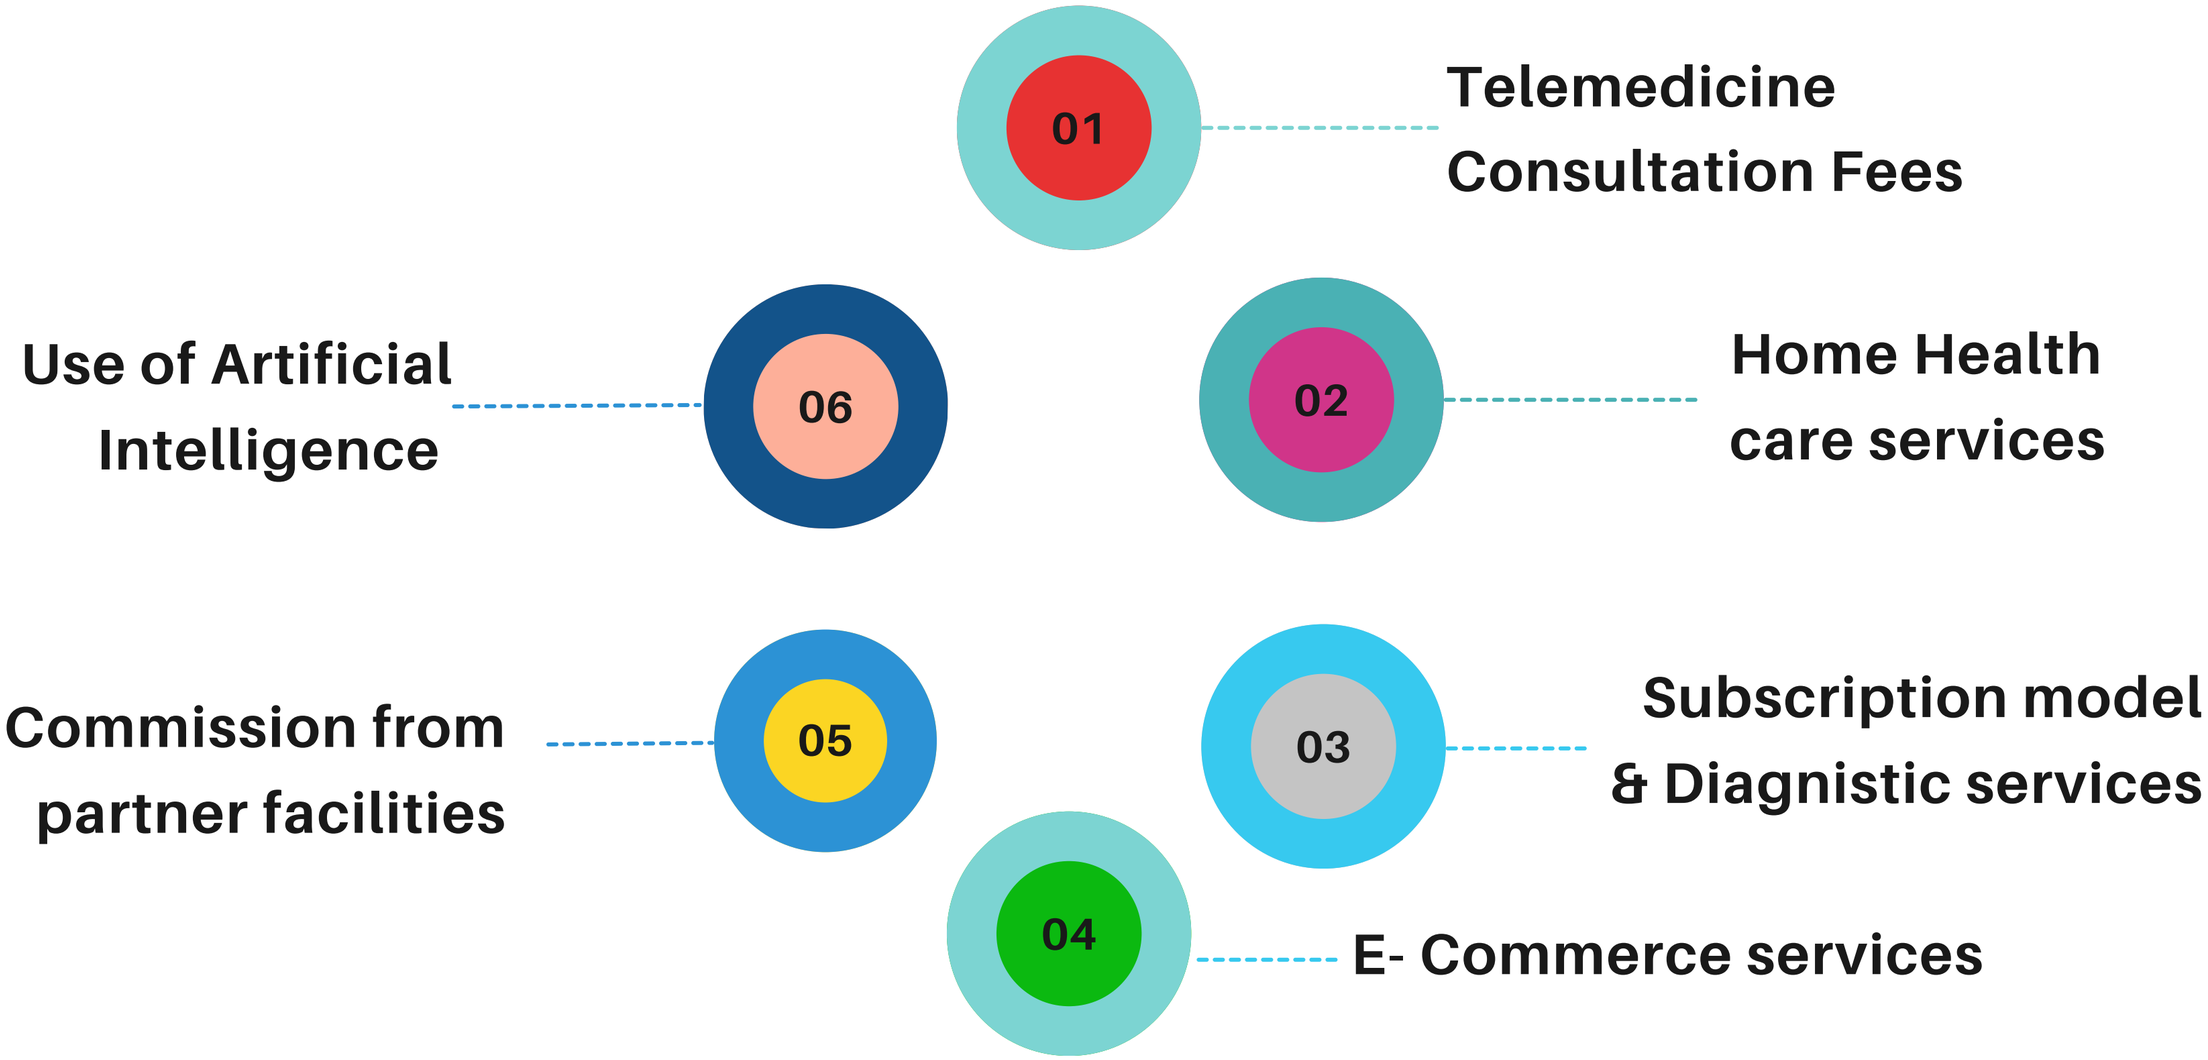
03 **Chronic Illness & Elderly Patients**

04 **Tech-Savvy Health Seekers**





BUSINESS MODEL



MYDR24 – TRANSFORMING HEALTHCARE WITH AI, AR/VR & EMERGING TECH

AI at the Core

- AI-driven symptom checker & health triage
- Predictive analytics for early diagnosis & chronic care
- Personalized treatment recommendations

Smart Teleconsultation

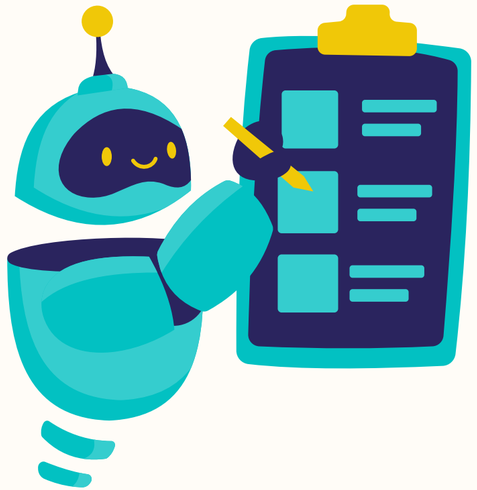
- AI matches patients with right specialists
- Smart queueing +
- language translation for rural reach
- Auto-generated consultation summaries using NLP

IoT Integration

- AI-driven symptom Real-time vitals monitoring from wearable devices

Empowering Healthcare with AI at MyDR24

MyDR24 is set to integrate cutting-edge AI technologies to enhance patient care and operational efficiency.



AI Features used in Mydr24

- AI-Powered Chatbot for Patient Support
- AI-Based Symptom Checker
- AI-Enhanced Appointment Scheduling
- PersonalizedTreatment Recommendations
- AI-Driven Remote Patient Monitoring
- AI-Powered Medical Document Processing
- Voice & Image Recognition for Elderly Patients
- AI-Enhanced Caregiver Matching
- Predictive Analytics for Healthcare Trends

Key implementations include an AI-powered chatbot for patient support, a smart symptom checker, remote health monitoring, AI-driven appointment scheduling, and personalized treatment plans. Additional innovations involve medical document processing, voice and image recognition for elderly patients, caregiver matching, and predictive health analytics. The initial focus will be on launching the chatbot and symptom checker to streamline patient interaction and early diagnosis
