

IoT based brain health monitoring system to understand persons' cognition status in real-time.

Having direct access to 80+ hospitals / centers across Tier II / Tier III Cities

We realized that

Physician / Therapist

80%

Patients miss follow-up visits after initial treatment

50%

Neuro-interventionalists are on call every other night

63%

Patients has poor treatment outcomes after first stroke

Stroke Patients

34.6%

Patients get demotivated to visit rehabilitation centers every week

- No standard rating systems
- Limited access to treatment and care

\$ 10,000

Out-of-Pocket Expenses

from various sensors

“An Integrated, affordable, real-time, data-driven personalized brain health management wearable system with enhanced patient-doctor follow-ups”

PRODUCT FEATURES

Personalized Brain Health Management System

“An Integrated, affordable, real-time, data-driven personalized brain health management wearable system with enhanced patient-doctor follow-ups”

UNIQUE SELLING PROPOSITION

Incremental & Disruptive; Technology Innovation

1

End-to-End
cost-effective
brain-health
Management
system

2

Targeted
brain-health
status
classification
algorithm
> 95%
accuracy

3

Beneficial
Interventions
(Audio-Visual
Training) to
improve
well-being

4

Multimodal
data
collection and
continuous
analysis

- Bridges the trust gap with objective care
- Assured therapy plan and high compliance
- Lifelong relationship for win -win outcomes

Data Streaming

Cloud Processing

Dashboard

Reports

Tier I / II/ III Cities

- Annual maintenance charge is included as a part of the lease contract (Minimum Period of 3 Years)
- Data Licensing and Data Exchange for Treatment plan
- Mobile subscription

Device + AMC and
Mobile application

B2B PaaS Model

INR 48000 (Services / Month) for Stroke clinics/ hospital

SELLING STRATEGIES

Direct Sales: to maximize margins

Channel Partners: to consolidate growth

+ 50%

**Cost reduction than
standard diagnosis**
